

# Weill Cornell Medicine

## Medical Offices

Brooklyn, New York

### Expanding Presence

Weill Cornell's outpatient primary care and pediatric group is moving from a smaller facility and doubling their size to support the growing community in Brooklyn.

### Multiple Specialties

Providing one location to serve a majority of patients' needs, Weill Cornell's intent is to have radiology and orthopedics on site and other specialties available.

### Patient Comfort

Mindful of the comfort of patients and differing healthcare needs, pediatric patients are received, wait, and are seen in a separate area from adults.
