

Weill Cornell Medicine

Ambulatory Facility

New York, New York

Patient Convenience

The space allows the medical team to provide a range of services featuring best-in-class equipment tailored to technical testing, visual fields, a treatment room, and multiple exam rooms.

Color Coordination

BAM kept Weill Cornell branding in mind throughout the project, incorporating the official colors into the finishes and furniture selection.

Increased Healthcare Access

The Weill Cornell signage and design elements promotes multiple services offered in the building, including ophthalmology, primary care, pediatrics, and OB/GYN practices.
