

Yale New Haven Health

Shoreline Master Plan

Master Plan, Expansion and Renovation
Guilford, Connecticut

Continuous Operation

The project was developed in two major phases to allow for the uninterrupted operation of the facility and continual treatment of patients.

Growing Medical Center

In addition to existing services of emergency care, ambulatory surgery, clinical labs, and medical offices, project includes major expansion of the emergency department and introduction of new capabilities, such as a Women's Center.

Improved Operations

Shoreline Medical Center has exceeded business goals since the completion of phased work, including forecasts for number of patients and reduction in wait times.
