

Yale New Haven Health

EP Lab and Hybrid Operating Room

New Haven, Connecticut

Leading Organization

Yale New Haven Health needed a state-of-the-art hybrid operating room and electrophysiology lab without disrupting the on-going medical work in adjacent rooms.

Fast Track Adaptability

This project was one of the fastest, if not *the* fastest completion of a comprehensive and complex Class C OR in the history of Yale. The project was not only completed on time but also on budget.

Design Standard

It is now being used as a model for design and project delivery of additional hybrid electrophysiology labs at Yale.
