## **Patient Convenience**

The space allows the medical team to provide a range of services featuring best-in-class equipment tailored to technical testing, visual fields, a treatment room, and multiple exam rooms.

## **Color Coordination**

BAM kept Weill Cornell branding in mind throughout the project, incorporating the official colors into the finishes and furniture selection.

## **Increased Healthcare Access**

The Weill Cornell signage and design elements promotes multiple services offered in the building, including ophthalmology, primary care, pediatrics, and OB/GYN practices.
