

Yale New Haven Health

Pediatric Emergency Department

New Haven, Connecticut

Medical Office Reconfiguration

Our team reconfigured the existing pediatric ED and admitting areas, opening up the space for new patient rooms, a touchdown area for staff, an accessible patient restroom, and exam room relocation.

Design Upgrade

The design involved installation of LED lights throughout and rubber sheet flooring, increasing maintenance efficiency, reducing costs and impact on daily operations.

Positive Client Reception

The medical team has praised the design for changes to building exterior, improvements in workflow, staff and patient circulation, and a bright, colorful atmosphere for improved patient and visitor well-being.
