

# Emblem Health

## Flushing Center

Neighborhood Care and Wellness  
Flushing, New York

### All-in-One

For ease of patients, this center addresses the multiple needs of the community. Medical specialties include an ambulatory surgery GI Suite, internal medicine, pediatrics, OB/GYN, other clinical specialties, and a call center to respond to patient questions. For staff, support areas include conference rooms, touchdown spaces, staff lounge, lockers, administrative offices, and wellness room.

### Heart of Community

In addition to the healthcare services and access to enrollment in insurance programs, the project includes a Neighborhood Care function and a community center. This makes this facility more than a medical office – it is a place to connect with the residents through educational and fun events. The space is used for public gatherings, meetings, and therapeutic sessions. Program offerings include classes on various life skills, and a very popular yoga practice.

### Welcoming Environment

Design capitalizes on natural light through strategic placement of open areas, classrooms, and high ceilings in Neighborhood Care, fostering a sense of comfort among patients and visitors alike.
