

Weill Cornell Medicine

Southampton Medical Facility

Southampton, New York

Growing Healthcare Network

BAM continues to collaborate with Weill Cornell Medicine on their expansion of primary care and reproductive medicine facilities throughout New York State. A unique aspect of this facility is how Weill Cornell balances operating hours for patients' needs between two medical practices. The Center of Reproductive Medicine (CRM) has high peak of patients from 7AM-11AM, while Primary Care's more active hours are closer to "regular" business hours of 9-5PM.

Calming Aesthetic

The design inspiration at the Southampton facility focuses on a tranquil, spa-like aesthetic. BAM designed a series of floral wall graphics installed throughout the medical office that inspire a sense of calm in patients and visitors alike.

Welcoming Facility

The wall graphics complement the sophisticated, high-end feel of the architectural and interior design aspects of the project, providing a welcoming space for Weill Cornell patients.
